Packaged expertise

In each CRISAM® Knowledge Pack the combined expertise of risk management manifests in the form of questions, evaluation guidelines and weightings for internal and external auditors. In order to ensure the identification of new risks and for keeping your CRISAM® IT risk management system state-of-the-art, it has to be adapted regularly with the latest CRISAM® Knowledge Packs.

Reporting

The relevant reports for your information security management system (ISMS) are already integrated into the CRISAM® Explorer. These are the reports business impact analysis, risk analysis, gap analysis, catalog of measures and implementation.
