## ISO 9001

This standard specifies the requirements of quality management systems (QMS) for organisations that are obliged to demonstrate their capability of providing products which:

- meet the customer specifications.
- are designed to consistently enhance customer satisfaction.
- meet any requirements imposed by the authorities.

The ISO 9001 standard describes a complete exemplary quality management system and is the basis for a comprehensive QMS.

## Reporting

The following QMS relevant reports are already integrated into CRISAM® Explorer: risk analysis, GAP analysis, catalog of measures and implementation.

## System requirements
